## SECOND PUBLIC WORKSHOP

The public is invited to participate in an interactive workshop in support of developing the Joint Land Use Study (JLUS).

The JLUS is a cooperative planning effort between Joint Base San Antonio (JBSA) - Randolph and the surrounding communities. The objective of the study is to develop a set of recommendations that will promote well-suited community growth and economic development compatible with military training and operations being conducted at JBSA-Randolph, JBSA-Seguin Auxiliary Airfield, and Stinson Municipal Airport.

The purpose of the 2nd public workshop is to provide an update on the JLUS project, present the JBSA-Randolph military mission footprint, and to obtain input from the public on prioritizing the compatibility issues such as land use, noise and vibration, aircraft safety zones, vertical obstructions and interagency coordination.

*First Public Workshop (October 16, 2013)*

## Your Input Matters

*The public is encouraged to attend this workshop. It is critical to obtain input from the community in order to develop a plan that is responsive to local needs. Please join us to hear about the JLUS and provide your input on local land use issues relevant to the JLUS.*
