

# Reconciliation Issue #3 - Outer Loop and Marion Rd

Guadalupe County	New Braunfels
1. FM 465 – IH 35 Connector as a 120-foot Major Arterial (R4 or U4M) Following Marion Road and Engel Road alignments	3. 200-foot wide corridor along New Braunfels Outer Loop alignment
2. 400-foot wide corridor along New Braunfels Outer Loop alignment	4. Creek Road is a 70-foot Arterial
	5. Green Valley Road is a 70-foot Arterial
	6. Weil Road is a 70-foot Arterial

**Questions:**

- 1) What should the combined Major Arterial and Outer Loop corridor look like?
- 2) If the Outer Loop is built in this area, should it have interchanges? If so, Marion Road is too close to Green Valley Road and Weil Road to have ramps for each. Is that appropriate for the way the region is developing?

**Functional Classification**

Parkway	Minor Arterial
Major Arterial	Major Collector
