

Retail Food Establishment Inspection Reports

The City of Seguin Planning/Codes Department is responsible for performing inspections at retail food establishments. Each retail food establishment operating in the city of Seguin is subject to routine inspections every six months. Retail food establishments include a variety of locations, including restaurants, school cafeterias, grocery stores, convenience stores, hotels and bars.

City of Seguin food establishment scores are based on a demerit system and not a 100-point scale; therefore, subtracting demerits from 100 does not provide an accurate representation of the inspection.

If an establishment receives an unacceptable score, a re-inspection is required and corrections must be made to bring the score into the acceptable range, in accordance with the [Texas Food Establishment Rules](#). If subsequent inspections scores are unacceptable, compliance actions will be taken.

The information on this site is designed to give consumers an indication of a food establishment's sanitation level during a routine inspection performed by the Planning/Codes Department. The inspection results provide consumers a look at an establishment's sanitation and procedures at the time of the inspection. It should not be assumed that the inspection results reflect how an establishment always operates. Consumers may draw their own conclusions from the information on this site.

While every effort is made to keep the information on this web site accurate and up-to-date, the City of Seguin is not responsible for discrepancies between information posted here and inspection reports on file at food establishment premises.

The City of Seguin began publishing these reports online in January 2015.

March 2015
